

Software version : 1.7.0.0
Precedent Software version : 1.6.0.0

Bug Fixes – version 1.7.0.0

- SEQUENCE:

In the menu, displayed after dragging a channel to a sequence step, two **Create New Part Fade** options were displayed instead of one.

After inserting a new step : [#] [INSERT], and **Editing Sequence Step : Pos #**, the new Preset # was not registerable.

Improvements– version 1.7.0.0

FETCH feature :

When using the Fetch function with attributes, for instance [#] [FETCH] [FOCUS], it is now possible to confirm while using [FETCH] again.

CHASER:

When creating a new Chaser, for instance [#] [CHASER] [ASSIGN], it is now possible to confirm while using [CHASER] again.

GROUP:

When loading and recording a new Group, [#] [GROUP] [ASSIGN], it is now possible to confirm while using [GROUP] again.

When recording a new Group, [#] [GROUP] [RECORD], it is now possible to confirm while using [GROUP] again.

PAGE:

When recording a new Page, [#] [PAGE] [RECORD], it is now possible to confirm while using [PAGE] again.

Consoles :

[Menu] as console button will open HATHOR menu.

[Start] can have field number as argument, and will then work directly for that field.

[C/ALT]&[ENTER] combination can now be used to exit any window, like (ESC).

New Features – version 1.7.0.0

General

IMAGO wing behavior.
